UNITS® Cloud

The one-stop solution for dealer server infrastructure.

Today, more and more dealers are interested in adopting a cloud-based solution so they can eliminate the complexity of in-house server infrastructure management. Auto-IT's **UNITS® Cloud** has been thoroughly researched to provide the optimal solution for our clients' unique requirements.

Discover how **UNITS® Cloud** can make your life simpler, easier, and less stressful.

The Benefits of Moving to **UNITS®** Cloud

Rapid Scalability

If you wish to acquire more dealerships or franchises, and need more server resources, this can be actioned quickly and effectively.

Cost Savings

There's no need to set aside valuable real estate in the dealership for a locked room, a server rack and cooling to house your server infrastructure. We handle all that for you.

Security

A hosted environment reduces the risk of fire, flood or theft bringing down your system. Plus, our anti-virus tools minimise the risk of cyber attacks.

Redundancy

The **UNITS® Cloud** environment includes additional redundancy should there be a hard-drive, power supply or memory failure in the server.

Simplicity

If there's a system issue, there's no need to bounce between hardware and software providers. Just call Auto-IT.

Disaster Recovery Planning

For additional peace of mind, you'll also receive a disaster recovery plan for your server environment.
